

# PAIN?

iNova Pharmaceuticals is pleased to invite you to attend a webcast

## Addressing muscle pain with spasm with orphenadrine

This meeting will focus on addressing muscle pain with spasm with the skeletal muscle relaxant orphenadrine. It will cover the role of muscle spasm in musculoskeletal pain and review the pharmacological options available for treating low back pain. This meeting will also explore how orphenadrine differs from other skeletal muscle relaxants and work through interactive case studies to help participants recognise patients who may benefit from orphenadrine alone (Norflex®) or in combination with paracetamol (Norgesic®).

 DATE

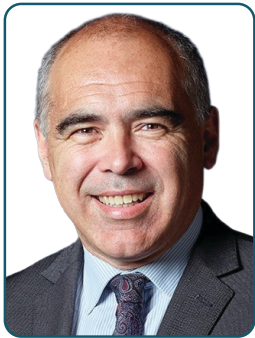

**Thursday**  
**25 JUN**  
**2026**

 START TIME

**6:30 PM (AEST)**

Online meeting room opens 30 minutes prior

 Presenter

### **Assoc. Prof. Marc Russo**

Specialist Pain Medicine Physician

Assoc. Prof. Marc Russo is a globally recognised Specialist Pain Medicine Physician and a pioneer in neuromodulation. He is the founder of Hunter Pain Specialists and Innervate Pain Management in Australia, where he developed the country's first successful private multidisciplinary pain management model. Assoc. Prof. Russo has led world-first spinal cord stimulator implantations and served as principal investigator in over 40 clinical trials, particularly in Complex Regional Pain Syndrome (CRPS). He holds academic roles at the University of Hong Kong and the University of Newcastle, and serves as President of the International Neuromodulation Society, contributing extensively to global pain medicine education and research.
